

Annual Technology Audit Readiness Assessment Checklist

Instructions

Use this checklist to evaluate your organisation's operational visibility, cybersecurity audit maturity, and resilience preparedness.

Score each item:

- Yes = 2 points
- Partial/In Progress = 1 point
- No = 0 points

Cybersecurity & Access Visibility

- We maintain updated inventories of devices and systems.
- MFA is enforced consistently across critical accounts.
- Access permissions are reviewed regularly.
- Former employee accounts are removed promptly.
- Endpoint visibility is actively maintained.

Infrastructure & Operational Resilience

- Hardware lifecycle reviews are conducted annually.
- Unsupported systems are identified and addressed.
- Backup testing is performed regularly.
- Recovery procedures are documented clearly.
- Network visibility is maintained consistently.

Software & SaaS Governance

- SaaS applications are reviewed regularly.
- Unused software subscriptions are removed.
- Shadow IT exposure is monitored.
- Cloud application access is reviewed regularly.
- Operational complexity is actively reduced where possible.

Vendor & Third-Party Oversight

- Vendor inventories are maintained.
- Third-party access permissions are reviewed.
- Operational dependency risks are evaluated.
- MSP and cloud provider accountability is reviewed regularly.
- Vendor continuity exposure is considered during planning.

Governance & Continuous Improvement

- Leadership receives technology audit visibility.
 - Audit findings are documented clearly.
 - Cross-functional participation occurs during audits.
 - AI and automation risks are reviewed operationally.
 - Audit processes are continuously improved.
-

Scoring Results

40–50 Points — Strong Operational Technology Maturity

Your organisation demonstrates strong operational visibility, governance maturity, and resilience-focused audit discipline.

Continue strengthening:

- continuous improvement,
 - recovery preparedness,
 - and operational adaptability.
-

20–39 Points — Moderate Technology Exposure

Your organisation has foundational operational visibility but may still face:

- governance gaps,
- software sprawl,
- operational blind spots,
- or continuity weaknesses.

Focus on:

- access governance,
 - SaaS visibility,
 - recovery testing,
 - and vendor oversight improvements.
-

0–19 Points — High Operational & Cybersecurity Risk

Your organisation may face significant exposure involving:

- weak visibility,
- unmanaged systems,
- unsupported infrastructure,
- operational fragmentation,
- or limited resilience preparedness.

Immediate priorities should include:

- inventory reviews,
- access cleanup,
- backup validation,
- governance strengthening,

and operational audit discipline improvements.
