

# Professional Cyber Readiness Self-Assessment Checklist

Score each item:

- Yes = 2 points
- Sometimes = 1 point
- No = 0 points

## Daily Protection Habits

- I pause before clicking urgent email links or attachments.
- I verify unusual payment or approval requests independently.
- I use unique passwords across important accounts.
- I use a password manager consistently.
- Multifactor authentication is enabled on key work accounts.
- I review login alerts and MFA prompts carefully.
- My devices are updated promptly.
- I lock my laptop and phone when unattended.

## Device & Access Control

- I avoid using unsecured public Wi-Fi without protection.
- I do not leave work devices unattended in public areas.
- Sensitive files are not stored casually on unsecured local drives.
- I regularly sign out of unused sessions and admin panels.
- I avoid mixing personal and business accounts unnecessarily.

## Cloud & File Sharing Discipline

- I review file sharing permissions before sending links.
- Temporary external access is removed when no longer needed.
- I know who currently has access to sensitive shared folders.
- I avoid oversharing documents using public unrestricted links.

## Communication Awareness

- I inspect sender details rather than trusting display names alone.
- I am cautious with executive urgency requests and invoice emails.

- I do not submit credentials through emailed login prompts without verification.
- I question messages that pressure immediate action.

## **Public Visibility & Professional Behaviour**

- I avoid posting operationally sensitive work information publicly.
  - I think carefully before sharing travel, vendor, or internal timing details online.
  - I maintain consistent cyber habits whether in office, remote, or traveling.
  - I follow a repeatable short cyber hygiene routine during the workweek.
- 

## **SCORING RESULTS**

### **40–50 Points → Strong Maturity**

You demonstrate strong professional cyber discipline and reduced day-to-day exploitability. Continue refining consistency.

### **25–39 Points → Moderate Exposure**

You understand many cyber basics but still maintain several workflow habits that attackers can exploit under pressure.

### **0–24 Points → High Vulnerability**

Your current professional routine likely contains multiple avoidable weaknesses that increase risk of account compromise, fraud, or operational disruption.
